Email & Collaboration

Access your email and collaborate with colleagues whenever you need to, on any device.

If you are looking for a secure and reliable email platform for your business, Microsoft Exchange Online presents the perfect solution. Exchange Online lets organisations both large and small reap the benefits of an enterprise grade email platform without investment, risk and overheads of internal infrastructure. With the full range of required functionality Microsoft Exchange is the world's foremost business email solution. Cloudserve can assist with the setup, migration and on-going support and management of Exchange Online as a fully managed service.

FEATURES

Simple & Flexible

Exchange Online makes business email simple and reliable with complete flexibility. Cloudserve provides a fully managed support and management service for Exchange Online tailoring the solution to your specific work processes and business requirements. A powerful control panel allows full self-service, but most businesses simply let Cloudserve manage this.

Access Anywhere

Access your email from any device, anywhere, in the office or on the move. Multiple access methods including full Outlook integration, smartphone, tablet and browser access.

Top Security

Automatic virus scanning, spam filtering and secure world class data centre infrastructure keeps your business email data safe secure and protects your staff from email based threats.

Reliability

Exchange Online is run directly from Microsoft's worldwide data centres, providing industry leading levels of reliability and availability. If you need your business email to be available 24x7 then Cloudserve's managed Exchange Online service is the perfect choice.

Email & Collaboration

Access your email and collaborate with colleagues whenever you need to, on any device.

Reduce costs, enhance functionality

Cloudserve's managed Exchange Online service is priced on a subscription basis with low cost per mailbox per month pricing. The monthly fee includes full support and management of the service. Any change requests and modifications are included in the monthly fees. Our fully managed service provides your business with the leading business email solution without a requirement for any internal expertise or knowledge. Share mailboxes and calendars, centralise contacts, manage appointments and meeting requests. The flexibility of Exchange online allows your email solution to precisely fit your specific business.

Migrate with ease

Cloudserve has a proven track record in successfully migrating businesses from legacy email systems to Exchange Online. Migrations can be undertaken seamlessly with minimal disruption. Full migration planning and support is provided as standard.

On-going support

Cloudserve is on hand to support your service 24x7, with proven expertise in Exchange Online management and access to high level Microsoft expertise as and when required.
